Mountain Weather Forecast

Southwest Highlands

Including Ben Nevis, Glen Coe and the rest of Lochaber, Argyll including the Isles, Loch Lomond, Trossachs and Arran

Forecast valid from 06:00 on Tuesday 09 Feb 2021 until 23:59 on Wednesday 10 Feb 2021

Forecast Issued on Tuesday 09 Feb 2021 at 02:50 by Met Office Aberdeen

Confidence: High confidence in general forecast of a cold easterly airstream continuing to affect Scotland for the forecast period. Growing uncertainty towards the end of the week as a low pressure system moves towards SW parts of the UK, however it looks like the cold air will continue to dominate.

Headline for Tuesday 09 Feb 2021: Snow showers for eastern ranges, drier and brighter in the west. Severe wind chill factor in fresh easterly winds.

Mountain weather hazards on Tuesday 09 Feb 2021

Blizzards No Likelihood	**Heavy Snow** No Likelihood	**Storm force winds** No Likelihood
Gales Low Likelihood	**Severe chill effect** High Likelihood	**Poor visibility** Low Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** No Likelihood

Forecast for Tuesday 09 Feb 2021

Weather: Snow showers will continue to push in from the east and through the central belt affecting more easterly ranges in the Trossachs and north of Callander but also beginning to feed further west into the Arrochar and Loch Lomond area, ranges further west will see a few light snow flurries but will mostly have bright or sunny spells.

Chance of cloud free mountain/hill tops above 800m: In the west 80%, in the east 40%, cloud will shroud the tops in snow showers which will be more frequent and heavier in the east.

Visibility: Visibility will be very poor in snow showers in the east with cloud falling to around 600m in heavier showers, possibly causing whiteout conditions at times. In the west visibility will generally be good for most of the day, perhaps falling poor in light snow flurries.
